Q2 2013 Results Presentation
29 August 2013

DISCLAIMER

This presentation may contain forward looking statements. These statements are based upon various assumptions, many of which are based, in turn, upon further assumptions, including the Company's management's examination of historical operating trends. Although the Company believes that these assumptions were reasonable when made, because assumptions are inherently subject to significant uncertainties which are difficult or impossible to predict and are beyond its control, the Company cannot give assurance that it will achieve or accomplish these expectations, beliefs or targets.

Key risk factors that could cause actual results to differ materially from those discussed in this presentation will include but not limited to the way world economies, currencies and interest rate environment may evolve going forward, general market conditions including fluctuations in charter rates and vessel values, counterparty risk, changes in demand in the dry bulk market, changes in operating expenses including bunker prices, crewing costs, drydocking and insurance costs, changes in governmental rules and regulations or actions taken by regulatory authorities, potential liability from pending or future litigation, general domestic and international political conditions, potential disruption of shipping routes due to accidents, piracy or political events, and other important factors described from time to time in the reports filed by the Company.

OUTLOOK

Global economic growth remains lacklustre;

Slowdown of China economic growth limits the recovery of freight rates;

Imbalance in supply and demand remains a problem to date;

Interest rate environment;

Cost side constraints.
